

## Declaration concerning WEEE

Trencin, October 30, 2023

VOIPAC TECHNOLOGIES s.r.o. (Voipac) hereby declares its commitment to a safe and healthy environment and has been working diligently to ensure its compliance with the WEEE legislation requirements.

The Directive 2002/96/EC of the European Parliament and of the Council of January 27, 2003 on waste electrical and electronic equipment (WEEE) came into force on February 13, 2005, and has been transposed into national law by the European Union (EU) member states.

The EU Directive 2002/96/EC was created to improve the collection and recycling of WEEE throughout the EU, and to reduce the level of non-recycled waste.

The directive 2002/96/EC was replaced by EU Directive 2012/19/EC of the European Parliament and of the Council of July 4, 2012 on waste electrical and electronic equipment and its amendments 2004/12/EC and 2018/852/EC.

This document provides a general description of Voipac's approach to meet the requirements of the WEEE legislation including EU Directive 94/62/EC on packaging and packaging waste and its amendments 2004/12/EC and 2018/852/EC. The directives gave some flexibility to the member states in implementing their individual WEEE regulations leading to the definition of varying implementation requirements by country and may involve considerations beyond those reflected in this document.

Voipac designs its products and packaging to comply with WEEE legislation by:

- Designing its equipment and packaging with consideration to future dismantling, recovery and recycling requirements
- Marking its products with the required symbols and informing users of their obligation to separate WEEE from general waste and dispose of it through the provided recycling systems
- Reporting information as required by the Slovak legislation

Voipac internal processes regarding packaging and packaging waste also comply with the Slovak Act on Waste no. 79/2015 that came into force on July 1, 2016, and the company is registered and actively participating in the system of collection, recovery and recycling of packaging waste organized by the producer responsibility organization ENVI-PAK.

For and on behalf of  
VOIPAC TECHNOLOGIES s.r.o.
